

Organic agriculture in the 21st century

Posted by cahnrs.webteam | February 16, 2016

WSU researchers assessed hundreds of published studies to see how organic farming performed against four key sustainability metrics: productivity, environmental impact, economic viability and social wellbeing. The results were published in the paper [Organic agriculture in the twenty-first century](#) by the journal *Nature Plants*, February 2016. The abstract for the paper can be found [here](#).
