* State site numbers are missing either because one or more sites initially designated in the field were combined into a single site record, or because a state site form corresponding to the field number was not turned in by the Cedar Mesa Project, or because a corresponding state site form was not located in the files that were searched to produce this table. The files consulted were those at the Bureau of Land Management office in Monticello, UT, at the Edge of the Cedars Museum in Blanding, UT, and at the Utah Division of State History in Salt Lake City. The GG 73 numbers were assigned on a brief horseback reconnaissance, and state site numbers were not filed by Cedar Mesa Project personnel at the time, although a few were added later.

** Nelson numbers are those assigned by Nels C. Nelson during his survey of Grand Gulch in the 1920s. Nelson referred to Bullet Canyon as "Graham" Canyon, hence the NCN GM numbers. The Wetherill numbers are those assigned by Richard Wetherill in the 1890s.
